

DATASHEET

Fuelfix & Tanks2Go Self-Bunded Fuel Trailer

A popular and extremely robust work horse of the fleet, our 1,200L Solar-Powered or Diesel-Powered Fuel Trailers provide a safe and reliable mobile refuelling solution. Whether you're looking for a backup fuel supply for your mining site, or supplemental capacity for small to medium sized construction projects, our 1,200L Fuel Trailers are the perfect solution. The stringent safety requirements of many work sites are met by the built-in safety features.

A larger self-bunded 2,000L Fuel Trailer is available for purchase.

Ease of Use

The key start diesel driven pump or solar powered option provides a totally independent mobile refuelling solution day or night, no matter how remote a location.

Safe

The dual axle construction makes the fuel trailer well balanced and easy to tow, even when fully loaded. It has excellent ground clearance yet retains a low centre of gravity. All required signage, LED tail-lights and reflective tape (on request) are installed.

Environment-Friendly

The bunded front containment area under the pump housing further reduces any risk of accidental spillage seeping into the ground.

Safe Fill: 1,200L	Height: 2,000 mm
Weight (Empty): 1,000 kg	Length: 4,250 mm
Weight (Full Tank): 2,016 kg	Width: 1,800 mm

These specifications are subject to variation. Please contact the Fuelfix Sales team for more information.

Standard Fittings

Heavy duty tyres on standard 16" rims with spare tyre, fluid level dipstick, automatic flashing refuelling light, emergency stop button with battery isolation switch, Graco 10m x 25mm diameter retractable hose reel with auto shut-off nozzle, 4 digit mechanical reset fuel meter, disc brakes with manual handbrake, jockey wheel with swivel retraction for optimum ground clearance, 50mm tow hitch, 2 safety chains with load-rated shackles, 2" dip point with camlock, 3" fill and vent point with camlock, 7 pin trailer plug, 9 kg dry powder fire extinguisher, statutory signage, 32L spill kit.

32L Spill Kit in top mounted tuff box includes:

- 2 x 1m miniboom to contain and absorb fuel spills
- 1 x pack of absorbent 300 x 300 pads
- Absorbent powder which holds 11 times own weight
- Protective gloves
- Bags for contaminated material to allow for safe disposal
